PREFACE

Wonder World SCIENCE is a series of science books for the students of classes 1 to 8. It has been designed in accordance with the National Education Policy (NEP 2020) and National Curriculum Framework (NCF 2023) visions. It ensures that each child gets the opportunity to learn multidisciplinary education through innovative means and methods. Our approach, as validated by the NCF, is interdisciplinary and incorporates the competencies goals. The NEP aims to support various learning paths that will include both formal and informal education. Making Indian students truly global citizens who are ready to step in future is the overarching objective. Keeping in mind the requirements, we have incorporated a perfect blend of Sustainable Development Goals (SDGs) encompass economic, social and environment dimensions.

The salient features of the series are:

- Each chapter begins with an Introduction that introduces the major topics it will cover.
- **Objective** gives a glance of topics that have been covered in the chapter.
- **Factopedia** provides some interesting facts related to the topic. These facts are accurate and have an extra spark of inspiration.
- **Key Words** help in explaining the important terms of the chapter.
- **Activity** is added inside the chapters to gain knowledge through playful activities.
- **Quick Recap** includes a brief summary of the chapter in the form of important points.
- **Abstract Analysis** includes objective as well as subjective questions as challenges for the students to retain and recall the concepts which they have studied.
- **Capability Analysis** is an extended learning which involves students actively by engaging them in real-world and personally meaningful projects. It covers scientific aptitude questions related to children's real-life situations which enriches learning as an interesting way followed by project or report working activities.
- **HOTS** questions help in developing the thinking skills of the students. It also covers value based questions which develop a strong relationship with surroundings.
- **Test Papers** are given at the end of each book to test the performance of the students.

We hope that the teachers and students will both be appreciative of our efforts. Any ideas for Improving the value of this series will be gratefully accepted. We eagerly await your comments and worthwhile recommendations for the series' continued improvement.

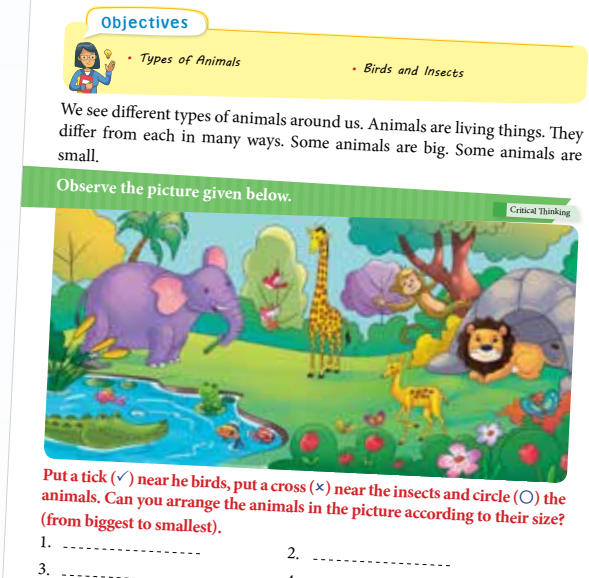

- Publisher

Special Features

Starter pages are given in each book to ignite a passion for environmental stewardship through captivating stories that inspire young minds to protect our planet.

Objectives : It gives a glance of topics that have been covered in the chapter

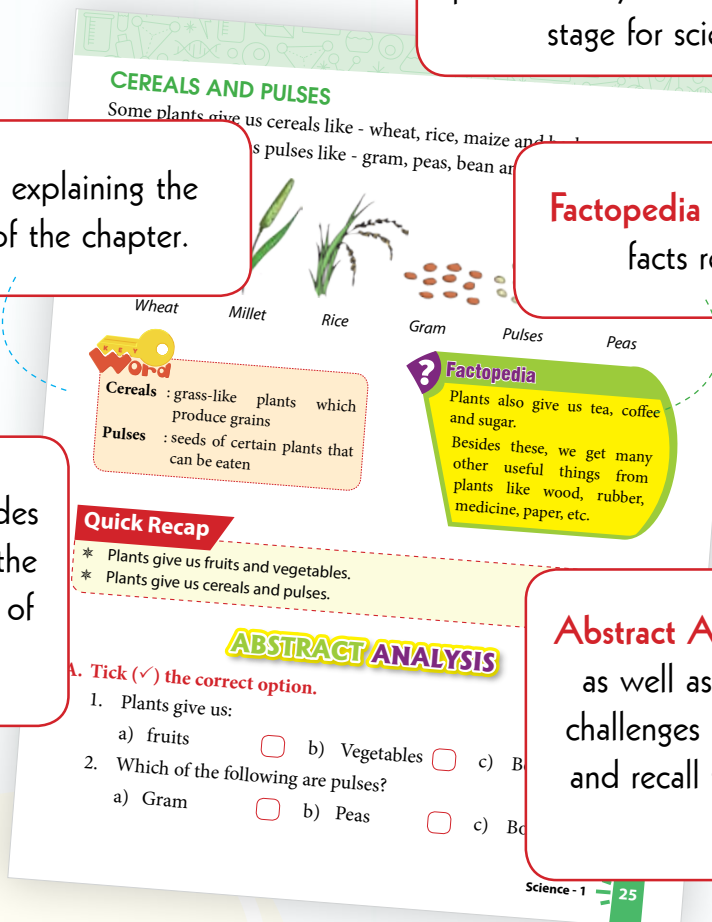

An activity is provided as chapter starts to spark curiosity and critical thinking, setting the stage for scientific exploration.

Key Word help in explaining the important words of the chapter.

Factopedia provides some interesting facts related to the topic.

Quick Recap includes a brief summary of the chapter in the form of important points.

Abstract Analysis includes objective as well as subjective questions as challenges for the students to retain and recall the concepts which they have studied.

CAPABILITY ANALYSIS

- A. Given below are pictures of some food items. Circle the food items with **blue** crayon that you take for breakfast and circle the food items with **red** crayon that you take for dinner.

Curd

Pulao

Rice

Vegetables

Milk

Egg

- B. Rearrange the letters to get the names of some food we eat.

1. Geg _____
3. Dbrea _____
5. Cier _____

2. Lidi _____
4. Imlk _____
6. Team _____

Critical Thinking

HOTS

You did not eat breakfast yesterday and were feeling weak at school. Why do you think you were feeling weak?

HOTS questions help in developing the thinking skills of the students. It also covers value based questions which develop a strong relationship with surroundings.

Capability Analysis is an extended learning which involves students actively by engaging them in real-world and personally meaningful projects. It covers scientific aptitude questions related to children's real-life situations which enriches learning as an interesting way followed with project or report working activities.

Test Paper 2

(Based on Chapter 1-6)

- A. Tick (✓) the correct option.

1. We eat _____ at night.
a) dinner ☐ b) lunch ☐ c) breakfast ☐
2. We wear gumboots in _____.
a) summer ☐ b) winter ☐ c) rainy season ☐
3. Which one causes damage?
a) Air ☐ b) Wind ☐ c) Storm ☐
4. What is the main source of water?
a) River ☐ b) Rain ☐ c) Lake ☐
5. We see this in the sky after it rains.
a) Clouds ☐ b) Rainbow ☐ c) White sky ☐

- st ☐ c) south ☐

Column B

- a) a) zebra crossing.
- b) Swimming
- c) open and safe place
- d) dustbin
- e) before getting in or out

Test Papers are given at the end of each book to test the performance of the students.

CONTENTS

Unit-1 : About Our Environment

- | | |
|------------------------|----|
| 1. The World Around Us | 11 |
|------------------------|----|

Unit-2 : About Plant Life

- | | |
|------------------------------|----|
| 2. The Green World Around Us | 17 |
| 3. Edible Plants | 23 |

Unit-3 : About Animal Life

- | | |
|-------------------------------|----|
| 4. Animals World | 27 |
| 5. Food and Homes for Animals | 33 |

Unit-4 : About Human Body

- | | |
|-------------------------|----|
| 6. Exploring Our Body | 40 |
| 7. What We Eat | 45 |
| 8. Housing and Clothing | 51 |
| 9. Safety and First Aid | 57 |

Unit-5 : About Our Universe

- | | |
|-----------------------------|----|
| 10. Air We Breathe | 64 |
| 11. Water We Drink | 69 |
| 12. Weather Today | 74 |
| 13. The Sun, Moon and Stars | 80 |

Test Paper 1	85
--------------	----

Test Paper 2	87
--------------	----

Be Tidy

Draw 😊 for kid having healthy habits and draw ☹️ for the kid having bad habits:

When Should We Wash Our Hands?

After riding bus.

After playing

After throwing garbage.

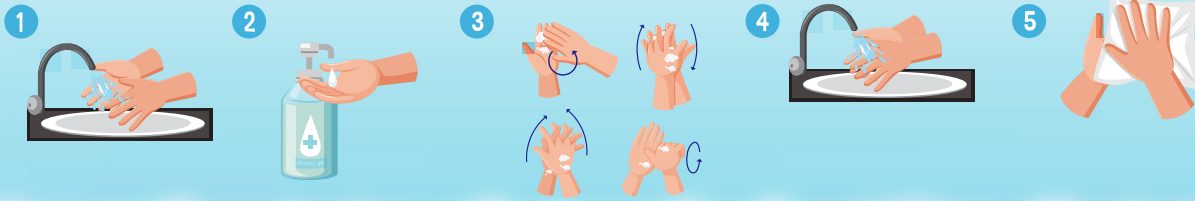

Before eating

After sneezing, wiping your nose or being around a sick people.

How to wash Our hands

- Turn on the water tap and get your hands wet. Turn off water tap.
- Put soap on your hands and rub them together to make bubbles.
- Rub your hands for about 20 seconds. Turn on water tap.
- Rinse off all the bubbles with water. Turn off water tap.
- Dry your hands with a clean towel.

Hand washing with soap and water can reduce sickness by up to 45%

After using toilet.

After playing with your pet.

Colour the kid who is tidy:

The World Around Us

Objectives

- Living Things
- Our Responsibility

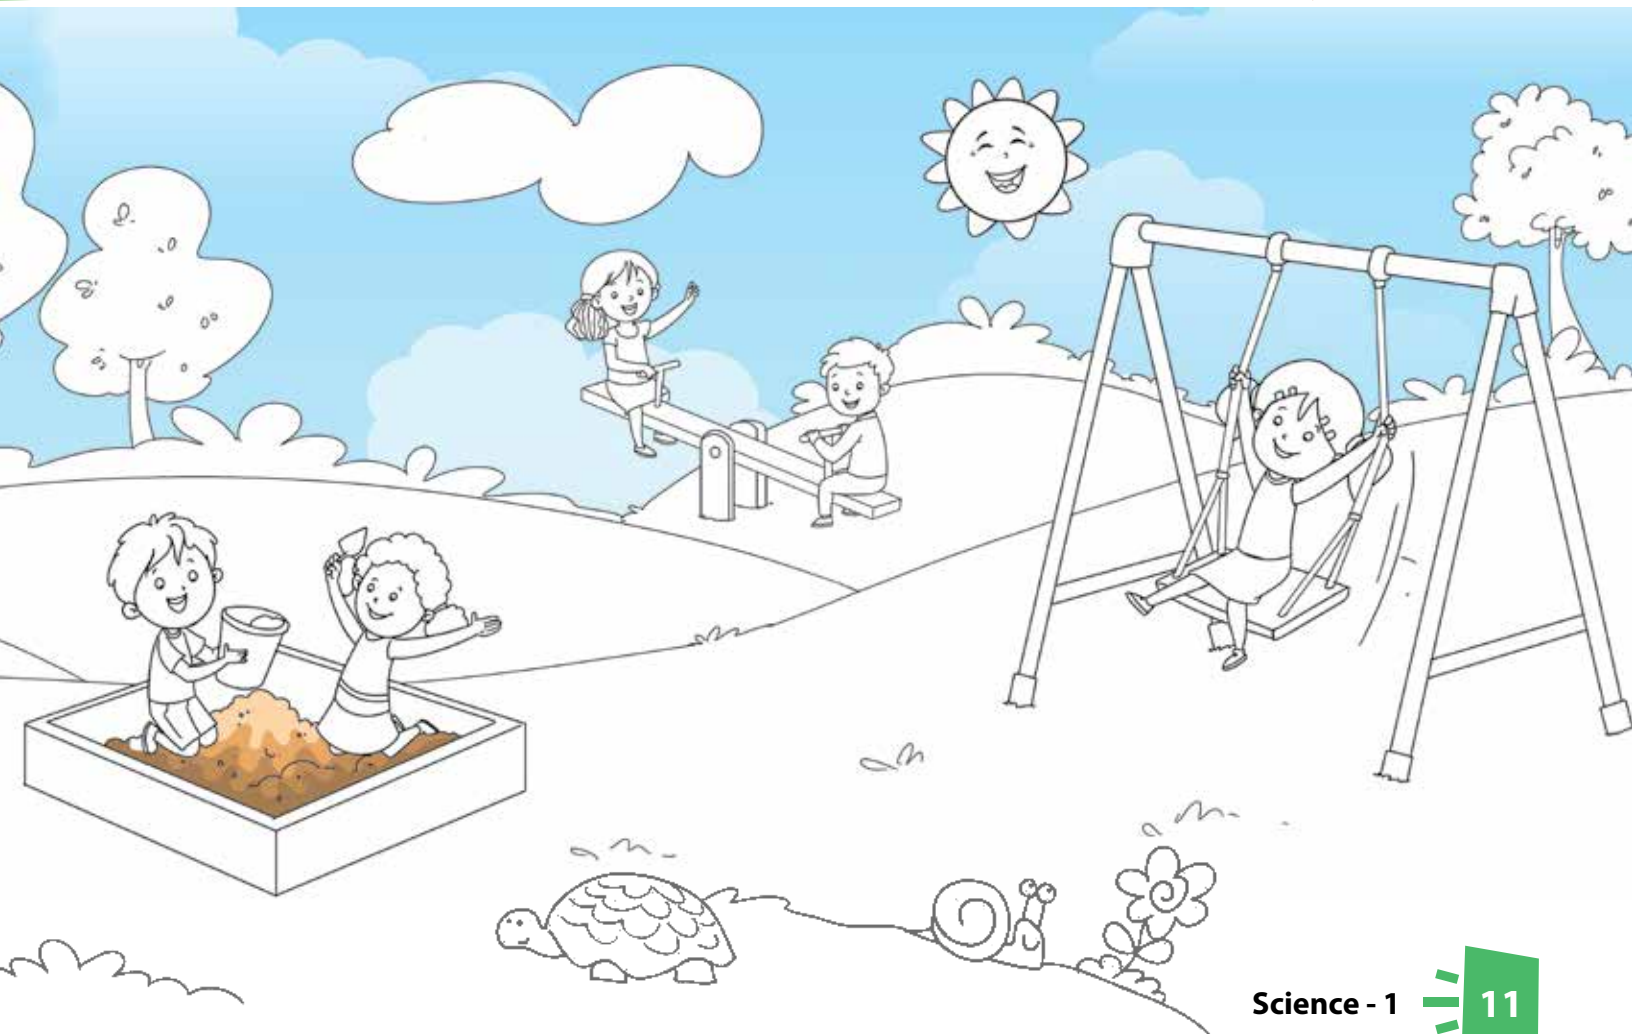

- Non-living Things

We live in an amazing world full of diversity. Everything around us has its own uniqueness. Our environment consists of people: men, women, boys and girls, as well as animals, roads, vehicles, parks, birds, air, water and many other elements.

Colour the picture beautifully.

Art Integration

The area around us is known as our **environment**, comprising both living and non-living things.

Let's explore and learn more about them.

LIVING THINGS:

- ☆ Require food, air and water.
- ☆ They move and grow.
- ☆ They **breathe** and eventually die.

environment : area around us

breathe : to take in oxygen and release carbon dioxide

Examples of living things are men, women, children, plants and animals.

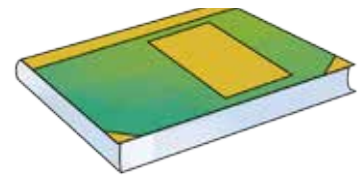

Living Things

NON-LIVING THINGS

Non-living things:

- ★ Do not require food, air, or water.
- ★ They neither grow nor move.
- ★ Do not breathe.

Examples of non-living things are benches, chairs, books, TVs, sticks etc.

Non-Living Things

OUR RESPONSIBILITY

We are an integral part of our environment and it is our duty to keep it clean. A clean and green environment helps us to stay healthy.

To maintain cleanliness, we should:

- Keep our surroundings clean.
- Always dispose of waste in a dustbin.
- Do not make your school, home and roads dirty.
- Plant trees.

Quick Recap

- ★ Living Things contain life, while non-living things do not.
- ★ It is important to keep our surroundings clean,
- ★ As a clean and green environment helps us maintain good health.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

- Things that make our environment are:
a) living ☐ b) non-living ☐ c) both a) & b) ☐
- Which one is an example of non-living things?
a) Cat ☐ b) Book ☐ c) Parrot ☐
- An apple tree is:
a) Living things ☐ b) non-living things ☐
c) none of these ☐
- We should maintain our environment green by_____.
a) painting ☐ b) mess up things ☐ c) planting trees ☐

B. A few words are listed in the box. Categorize them into two groups: living and non-living.

Fish Ball Bus Boy Girl Pencil Parrot Book

Living Things

Non-Living Things

C. Answer the questions.

1. Give three examples of living things.

2. Give three examples of non-living things.

3. Write two things we should do to clean our environment clean.

CAPABILITY ANALYSIS

A. Circle the example of living from pictures given below.

Critical Thinking

B. Compare the characteristics of living things by comparing two items in your class. (For example: Compare a table with a child.)

Multidisciplinary Learning

C. Write Yes or No for the things in the given table.

Critical Thinking

Objects	Grows	Eats	Moves on its own	Has babies	Living things
	Yes	Yes	Yes	Yes	Yes
					
					
					
					
					

D. Make a poster asking people to keep the environment clean.

Art Integration

E. Try to get some information on why non-living things are also important for our environment.

Scientific Temper

F. Do an experiment how plant will grow if it did not get enough water and sunlight.

Experiential Learning

G. Mention about the dirty objects you saw on your way to school.

Experiential Learning

HOTS

Why do living things need food?

Critical Thinking

The Green World Around Us

Objectives

- Types of plants
- Parts of a plant
- Plants Grow from seeds

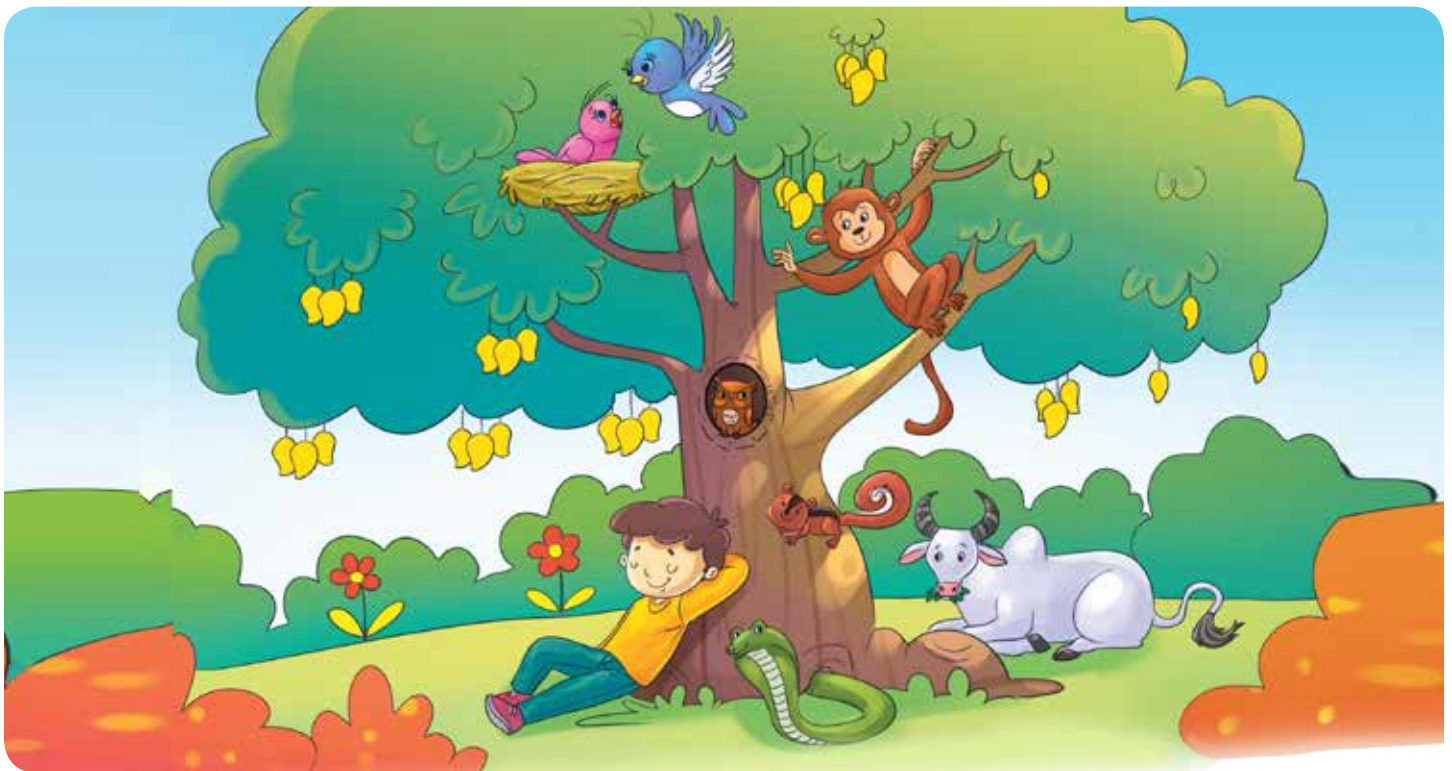

Have you ever thought about where birds make their homes?

They make nests on the branches of trees.

Birds enjoy eating the fruits from trees.

Take a look at the image of this welcoming tree.

Multidisciplinary Learning

Can you count how many animals are visible in the picture?

If trees are cut down, all these animals will lose their homes.

Plants of many kinds grow around us. They make our world colourful and beautiful. Some plants are tall and strong, while others are small and delicate.

TYPES OF PLANTS

Plants exist in different types; some grow large, while others remain small.

Large Plants

Very large plants are known as trees.

Trees have many leaves.

Their thick stems are called trunks.

Trees can live for many years.

The trunk supports multiple branches.

Leaves, flowers and fruits grow on these branches.

The outer layer of the trunk is called bark.

Mango Tree

Small Plants

Shrubs

Some plants are smaller than trees.

These plants are called **shrubs**/bushes.

Bushes have many small branches, making them bushy.

They have woody stems.

Bushes typically live for only a few years.

shrub : small and not as strong as tree

Rose Plant

Hibiscus Plant

Cotton Plant

Herbs

Herbs are delicate plants.

They have soft, green stems.

Herbs live for a few months.

Coriander Plant

Mint Plant

PLANTS THAT CANNOT STAND UPRIGHT

Some plants are too weak to grow upright.

They require support to grow straight.

These plants climb on a pole, wall, or other plants for support.

Such plants are known as **climbers**.

Money Plant

Grapevine

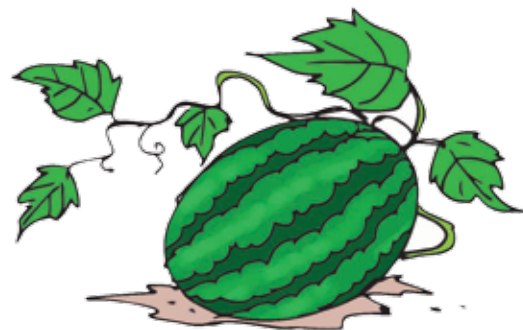

herbs : have soft and green stems.

climbers : Weak plants that require support to grow upright

Certain plants grow along the ground and are known as **creepers**.

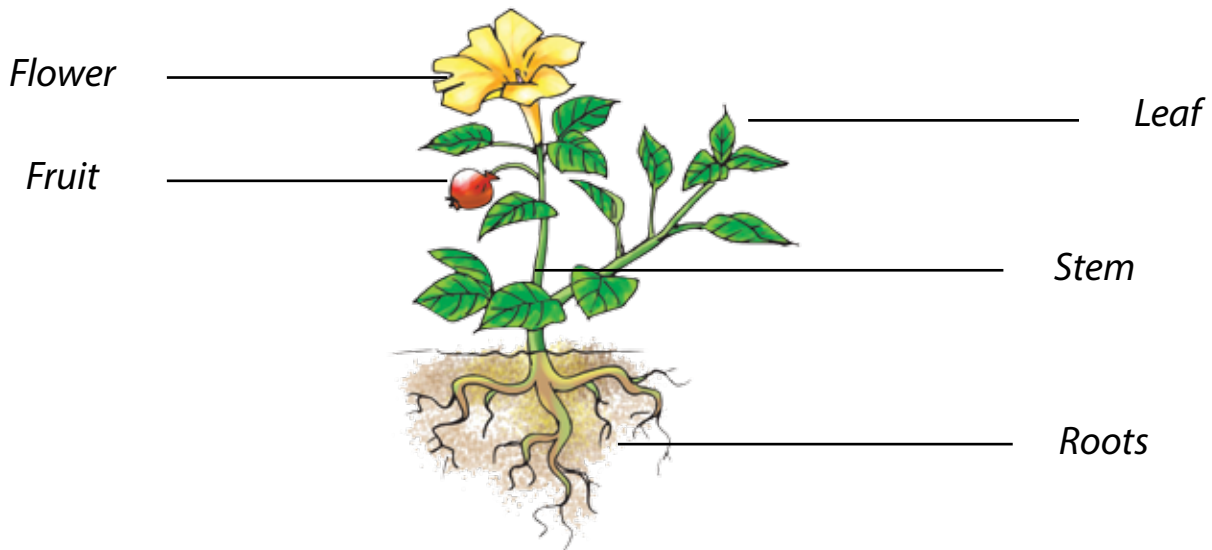

Pumpkin

Watermelon

PLANT PARTS

A plant have several parts.

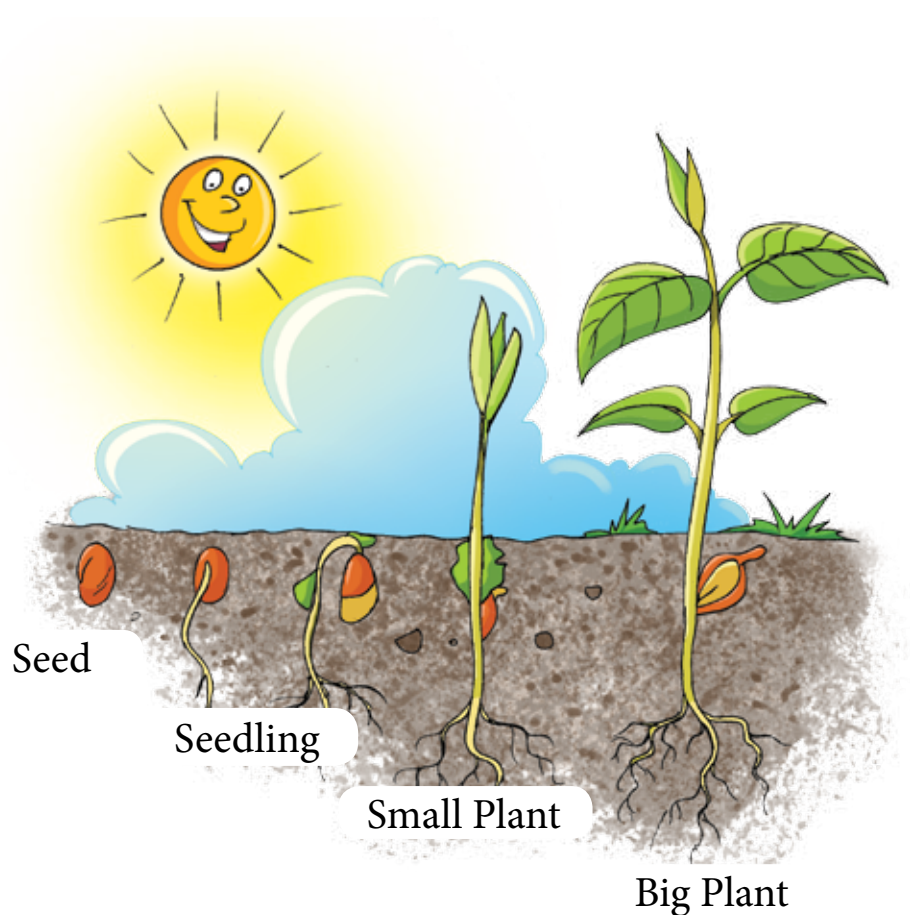

HOW PLANTS GROW FROM SEEDS?

The majority of plants grow from seeds.

Each seed contains a small baby plant.

Plants need light, air and water to grow.

Soil is also necessary, as it supplies vital **nutrients** for growth.

Germination of a seed

Quick Recap

- ★ Big plants are called trees.
- ★ The outer layer of a tree trunk is called bark.
- ★ Herbs are small and delicate plants.
- ★ Climbers and creepers have weak stems.
- ★ The main parts of a plant are- the roots, stem, leaves, flowers and fruits.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

- Very large plants are known as:
a) Shrubs ☐ b) Trees ☐ c) Herbs ☐
- Which is the example of herbs plant ?
a) Rose ☐ b) Pumpkin ☐ c) Mint ☐
- Which is not known as creeper ?
a) Spinach ☐ b) Watermelon ☐ c) Pumpkin ☐

B. Fill in the blanks from given words.

- _____ have weak stems.
- The stem of a tree is known as _____.
- Shrubs live for a _____ years.
- _____ are very delicate plants.

Climbers

Herbs

few

trunk

C. Match the correct option.

Column A

- Hibiscus
- Money plant
- Pumpkin
- Mint

Column B

- Creeper
- Herb
- Shrub
- Climber

D. Answer the given below.

1. Explain trees with one example?

2. What are the various parts of a plant?

CAPABILITY ANALYSIS

A. Take a nature walk and collect leaves of various plants to paste in your notebook.

Art Integration

B. Create a leaf rubbing.

Creativity

Place a leaf on a table and cover it with a thin sheet of paper. Then, gently rub your pencil over it.

Did you get an impression of the leaf on the paper? This is called leaf rubbing. You can also create “bark rubbing’s” in a similar way.

Scan me to watch
the tutorial

C. Grow a pea garden at home.

Environment and Health

1. Take an empty jar and place a paper towel inside it.
2. Add a few pea seeds into the jar.
3. Lightly water the jar to moisten the paper towel, ensuring the seeds stay in place.
4. Place the jar in a safe spot and check it regularly to notice any changes.

Observe the growth of the seeds and discuss it with your teacher.

Edible Plants

Objectives

- Fruits
- Cereals and pulses
- Vegetables

Eating all types of fruits and vegetables helps us stay healthy.

Complete the pattern by drawing the correct image of fruit and vegetable

Critical Thinking

Vegetables

Fruits

Most of the food we eat comes from plants. We get food from different parts of plants.

FRUITS

Plants give us fruits. The juicy and fleshy parts of plants are called **fruits**. Fruits develop from flowers. Fruits are good for our health.

Apple

Mango

Banana

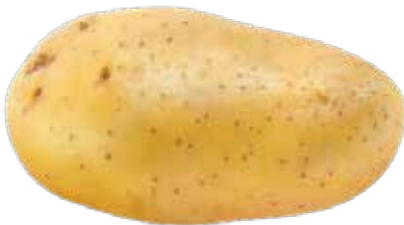

VEGETABLES

We get vegetables from different parts of plants like-roots, stems, leaves, flowers and fruits. Fresh and green vegetables are good for our health.

Factopedia

An apple a day keeps the doctor away.

Potatoes (Stem)

Brinjal (Fruit)

Radish (Root)

Cauliflower (Flower)

Spinach (Leaves)

CEREALS AND PULSES

Some plants give us cereals like - wheat, rice, maize and barley.

Some plants give us pulses like - gram, peas, bean and urad.

Wheat

Millet

Rice

Gram

Pulses

Peas

Cereals : grass-like plants which produce grains

Pulses : seeds of certain plants that can be eaten

Factopedia

Plants also give us tea, coffee and sugar.

Besides these, we get many other useful things from plants like wood, rubber, medicine, paper, etc.

Quick Recap

- ★ Plants give us fruits and vegetables.
- ★ Plants give us cereals and pulses.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. Plants give us:

a) fruits ☐ b) Vegetables ☐ c) Both a) & b) ☐

2. Which of the following are pulses?

a) Gram ☐ b) Peas ☐ c) Both a) & b) ☐

3. We get coffee from:

- a) Animals ☐ b) Plants ☐ c) Both a) & b) ☐

4. Which of the following is a vegetable?

- a) Potato ☐ b) Banana ☐ c) Apple ☐

B. Match the correct option.

Column A

1. Fruit
2. Food grain
3. Pulses
4. Vegetable

Column B

- a) Peas
- b) Mango
- c) Brinjal
- d) Maize

CAPABILITY ANALYSIS

A. Fill a bag with different fruits and vegetables. Blindfold your student. Now give your student assorted fruits and vegetables. Ask your student to identify them by feeling their texture, smell, shape and size

Give one point for every correct answer. The person with the most points is the winner.

Leadership Skills

B. Draw and colour any two vegetables in your scrapbook.

Art Integration

C. Make a colourful and tasty fruit salad. See if you can try a fruit you've never had before!

Vocational Skills

HOTS

Do all vegetables need to be cooked before eating?

Critical Thinking

Animals World

Objectives

• *Types of Animals*

• *Birds and Insects*

We see different types of animals around us. Animals are living things. They differ from each in many ways. Some animals are big. Some animals are small.

Observe the picture given below.

Critical Thinking

Put a tick (✓) near the birds, put a cross (×) near the insects and circle (○) the animals. Can you arrange the animals in the picture according to their size? (from biggest to smallest).

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

frog
butterfly
sparrow
deer
elephant
lion

Some animals live in forests while others live in our houses. We also domesticate some animals. Some animals live on land and some of them live in water.

TYPES OF ANIMALS

Animals which live in forests are called **wild animals**.

Elephants, lions, tigers, giraffes, zebras, snakes, deers, bears, monkeys, hippopotamus, rhinoceros, etc., are wild animals.

Zebra

Tiger

Bear

Snake

Some animals live in our homes and on the farms. They can be seen all around us. Such animals are called **domestic** or pet animals.

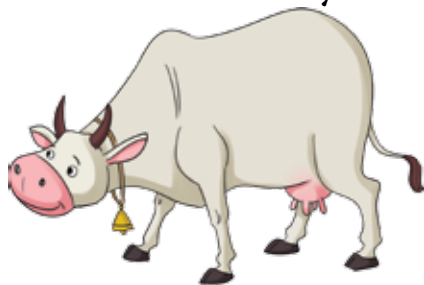

domestic : Kept in homes or farms

Cows, cats, dogs, horses, pigs, goats, hens, sheeps and ducks are domestic or pet animals. These animals are very useful to us.

Sheep

Cow

Horse

Pig

Animals which live in and around water are called **water animals**. Fish, frogs, turtles, turtle and crocodiles are water animals.

Fish

Crocodile

Turtle

Frog

BIRDS AND INSECTS

Birds are flying animals. They have two legs and one beak. Their wings help them to fly. Crow, pigeon, owl, hen, ostrich, penguin, eagle, parrot and peacock are birds.

Pigeon

Crow

Parrot

Owl

Factopedia

Birds eat with their beaks. They do not have teeth.

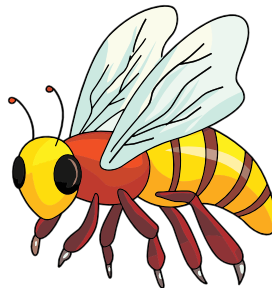

insects : small animals having six legs

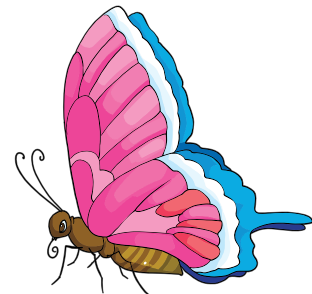

Insects are very small in size. They have six legs. Some insects have wings and can fly. Cockroaches, spiders, flies, ants, bees, butterflies, grasshoppers and mosquitoes are insects.

Mosquito

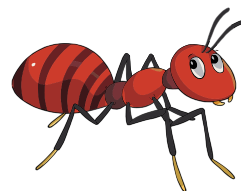

Honeybee

Butterfly

Housefly

Ant

Quick Recap

- There are different kinds of animals around us..
- Some animals live in forests, they are called wild animals.
- Some animals live with us are called domestic animals.
- Animals which live in water are water animals
- Birds are flying animals.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. Which one of the following is a domestic animal?

a) Giraffe ☐ b) Tiger ☐ c) Dog ☐

2. Which one of the following is a bird?

a) Ostrich ☐ b) Ant ☐ c) Cow ☐

3. Which one of the following is an insect?

a) Sparrow ☐ b) Parrot ☐ c) Spider ☐

4. Which one of the following is the biggest animal?

a) Dog ☐ b) Elephant ☐ c) Horse ☐

B. Write T for true and F for false statements.

1. Owl is an animal. ☐

2. The mosquito is an insect. ☐

3. Dog is a domestic animal. ☐

4. We also domesticate some animals. ☐

5. Turtle is a water animal. ☐

C. Answer the following questions.

1. What do you mean by wild animals? Give two examples.

2. What do you mean by domestic animals? Give two examples.

3. How do birds fly? Write three examples of birds.

4. How many legs do the insects have?

CAPABILITY ANALYSIS

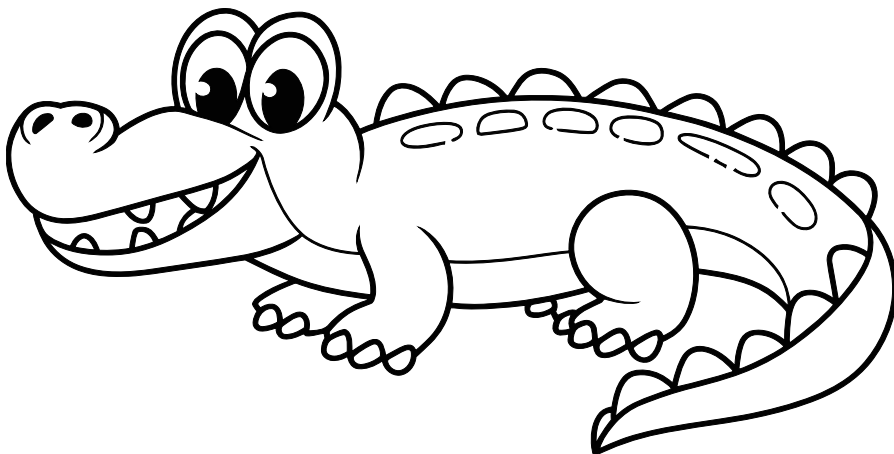

A. Encircle the domestic animals in the following pictures.

Critical Thinking

B. Colour the following pictures and write the name of animal.

Art Integration

C. Let's go on a virtual jungle Safari right in your living room!

Take a wild leap into the exciting world of the Cadbury play Pad. Download the Cadbury PlayPad App today to have an incredible experiences with 3D animals.

Digital Resources

Explore and learn interesting facts, play exciting games and much more on the App.

D. Look at these two animals carefully and answer the questions.

1. Big or small in size?

Experiential Learning

Elephant _____ Parrot _____

2. Do they have wings - yes or no?

Elephant _____ Parrot _____

3. How do they move - walk or fly?

Elephant _____ Parrot _____

4. Are they of same colour - yes or no?

E. Make quick and easy woodland animal and superhero leaf masks using pressed and dried leaves and felt tip pens.

Creativity

HOTS

Why do we keep some animals at our home?

Critical Thinking

Food and Homes for Animals

Objectives

• Homes of Animals

• Food of Animals

As we need home and food to live our lives, animals also need home and food to live their lives comfortably. Animals move differently depending on their environments.

Look at the animals and complete their details with suitable word given in the box.

Multidisciplinary Learning

jump

run

fly

hop

swim

monkey

HOMES OF ANIMALS

Just like us, animals also need a home to protect themselves from the heat, cold, rain and enemies. Just as we make our home to live in, some animals also make their own home.

Birds make nests to live in.

Some snakes live in holes.

Rabbits make burrows to live.

Bees make beehives to live.

Spiders make webs to live.

beehive : house of bee

pet animals : animals that we keep at home

Some animals live in home made by us. These animals are called **pet animals**.

Horse lives in a stable.

Cow lives under a shed.

Dog lives in a kennel.

Hen lives in a coop.

Some animals do not make their home. They find a place to live in. Monkeys live on a tree. Deer, elephants, zebras and giraffes live under shades of the trees. Lions, tigers, foxes and bears all find caves to live in.

Homes under the trees

Den of lion

FOOD OF ANIMALS

Animals also need **food** to live. Different animals eat different kinds of food.

Some animals love to eat plants.

Food : that we eat to get energy

Cow

Goat

Horse

Elephant

Some animals catch insects and eat them. For example: Frogs, lizards, spiders, etc.

Frog

Lizard

Some animals eat seeds and grains. For example: Rats, squirrels, hens, sparrows, pigeons, etc.

Pigeons

Hen

Squirrel

Some animals eat flesh or meat of other animals. For example, lions, tigers, bears, foxes, wolves, cats, dogs, snakes, vultures, etc.

Tiger

Snake

Vulture

REVIEW

- ✱ Some animals make their own home like birds, bees, rabbit, etc.
- ✱ Some animals live in homes made by us.
- ✱ Animals need food to stay alive.
- ✱ Different animals eat different kind of foods.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. Animals also need?

a) Home

☐

b) Food

☐

c) Both a) & b)

☐

2. Animals who live in our home with us are called?

- a) Water animals ☐ b) Pet animals ☐ c) Insects ☐

3. Different animals eat _____ kind of food?

- a) Different ☐ b) Same ☐ c) Both a) & b) ☐

4. Which of the following animals eats grass?

- a) Lion ☐ b) Cow ☐ c) Lizard ☐

5. _____ make burrows to live?

- a) Snakes ☐ b) Birds ☐ c) Rabbits ☐

B. Match the correct option.

Column A

1. Cow

2. Hen

3. Lion

4. Horse

5. Dog

Column B

a) Stable

b) Kennel

c) Shed

d) Den

d) Coop

C. Fill in the blanks with suitable words given in the box.

shed

food

trees

lion

insects

1. Monkeys live on_____.

2. A cow lives under a _____ .

3. All animals do not eat the same _____.

4. Some animals catch_____ and eat them.

5. _____ eats the flesh of other animals.

D. Answer the following questions.

1. Why do animals need home?

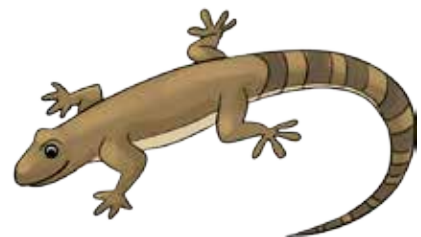

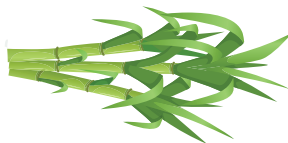

2. Which animals make holes in the ground?

3. What is a kennel?

CAPABILITY ANALYSIS

A. Take the animals to their favourite food.

Critical Thinking

**B. Some animals went looking for food and forgot the way to their home.
Can you match the animals with the places where they live?**

1.

a)

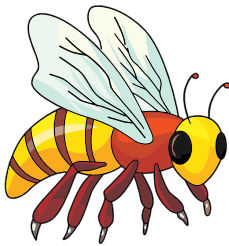

2.

b)

3.

c)

4.

d)

C. Different birds make different kinds of nests. Look for a bird's nest in your neighbourhood. Find out what the bird has used to build its nest.

Experiential Learning

D. Make a model of a nest using different materials such as dried leaves, grass, twigs, etc.

Creativity

Exploring Our Body

Objectives

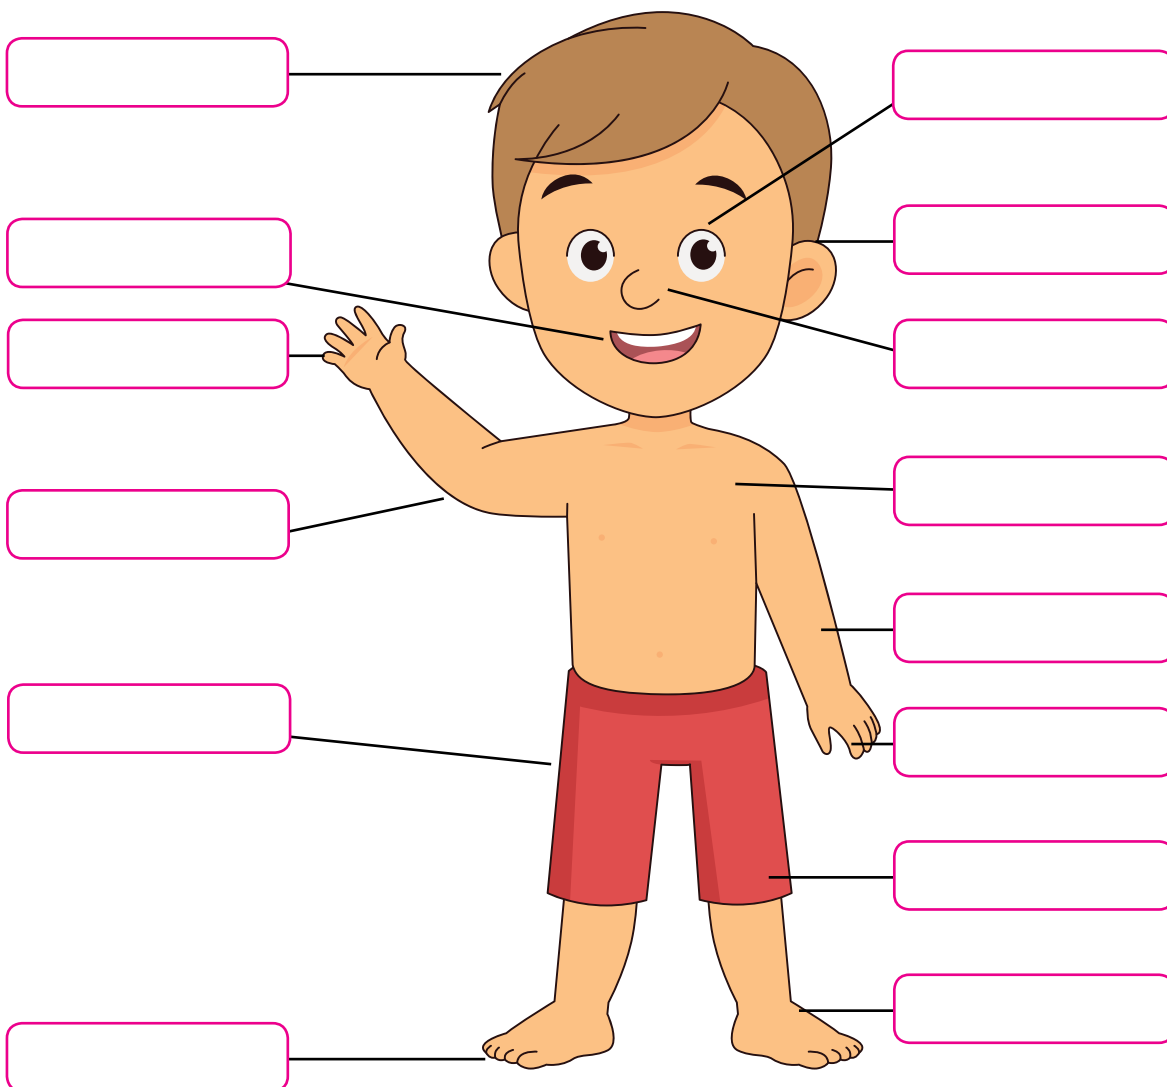

• *Our Body Helps us*

• *Sense Organs*

Human body is made up of many parts. Each part of our body has a different name and function.

Look at the picture and label each part of the body.

Critical Thinking

Head
Hair
Eyes
Ears
Nose
Mouth
Teeth
Tongue
Neck
Shoulders
Arms
Elbows
Hands
Fingers
Chest
Stomach
Legs
Knees
Feet
Toes

OUR BODY HELPS US

We use our hands to eat, write and hold things.

We use our legs to walk, run, skip and kick.

SENSE ORGANS

We have five sense organs. They are eyes, ears, nose, tongue and skin.

All our sense organs help us to know the world around us. These 'five friends' are called **sense organs**.

We have two eyes. We see with them

We have one nose. We smell with it

We have two ears. We hear with them

We have one tongue. We taste with it

Our whole body is covered with skin. We feel things with it

To be healthy, we must keep our body clean. We must take care of every part of our body.

Quick Recap

- ✱ We do many things with the different parts of our body.
- ✱ We use our hands to eat, write and hold things.
- ✱ We use our legs to walk, run, skip and kick.
- ✱ We have five sense organs.
- ✱ Sense organs help us to know the world around us.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. Ears help us to:

- a) Hear ☐ b) See ☐ c) Touch ☐

2. Ice cream is cold. We feel it with our:

- a) Tongue ☐ b) Ear ☐ c) Nose ☐

3. Nose helps us to smell:

- a) Music ☐ b) perfume ☐ c) Both a) & b) ☐

4. Our whole body is covered with:

- a) Tongue ☐ b) Nose ☐ c) Skin ☐

B. Match the correct option.

Column A

1. Tongue
2. Ears
3. Hands
4. Legs
5. Eyes

Column B

- a) Kicking ball
- b) Watching T.V.
- c) Tasting food
- d) Holding book
- e) Listening to music

C. Fill in the blanks with suitable words given in the box.

five

two

one

skin

hands

1. We use our _____ to eat, write and hold things.
2. We have _____ sense organs.
3. We have _____ eyes.
4. _____ is the largest sense organ.
5. We have _____ nose.

D. Answer the following questions.

1. Which sense organ helps us to hear music?

2. What are the five sense organs?

CAPABILITY ANALYSIS

A. To swim and to ride a bicycle, we need both our hands and feet.

Can you think of some more activities where you use both your hands and feet?

Experiential Learning

1. _____
2. _____
3. _____
4. _____

B. Suppose you go to an orchard (where fruits are grown). Name one sense organ each you will need to enjoy the following.

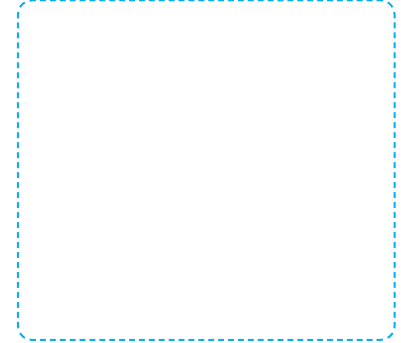

Multidisciplinary Learning

1. fresh apples _____
2. fresh air _____
3. birds chirping _____
4. beautiful flowers _____

C. Colour the correct boxes to describe yourself. Paste your picture in the box.

Art Integration

- | | | | | |
|-----------|--------------------------|--------------------------|--------------------------|--------|
| 1. I have | ☐ | ☐ | ☐ | eyes. |
| 2. I have | ☐ | ☐ | ☐ | ears. |
| 3. I have | ☐ | ☐ | ☐ | hands. |
| 4. I have | ☐ | ☐ | ☐ | legs |

D. Practising tongue twisters helps improve pronunciation and speaking skills. Check out the following list of funny tongue twisters. Practise them on a daily basis to improve your pronunciation.

Communication Skills

I saw a kitten

the kitchen.

I saw Susie
sitting in a shoe
shine shop.

We surely shall see
the sun shine soon.

Santa's short
suit shrunk.

What We Eat

Objectives

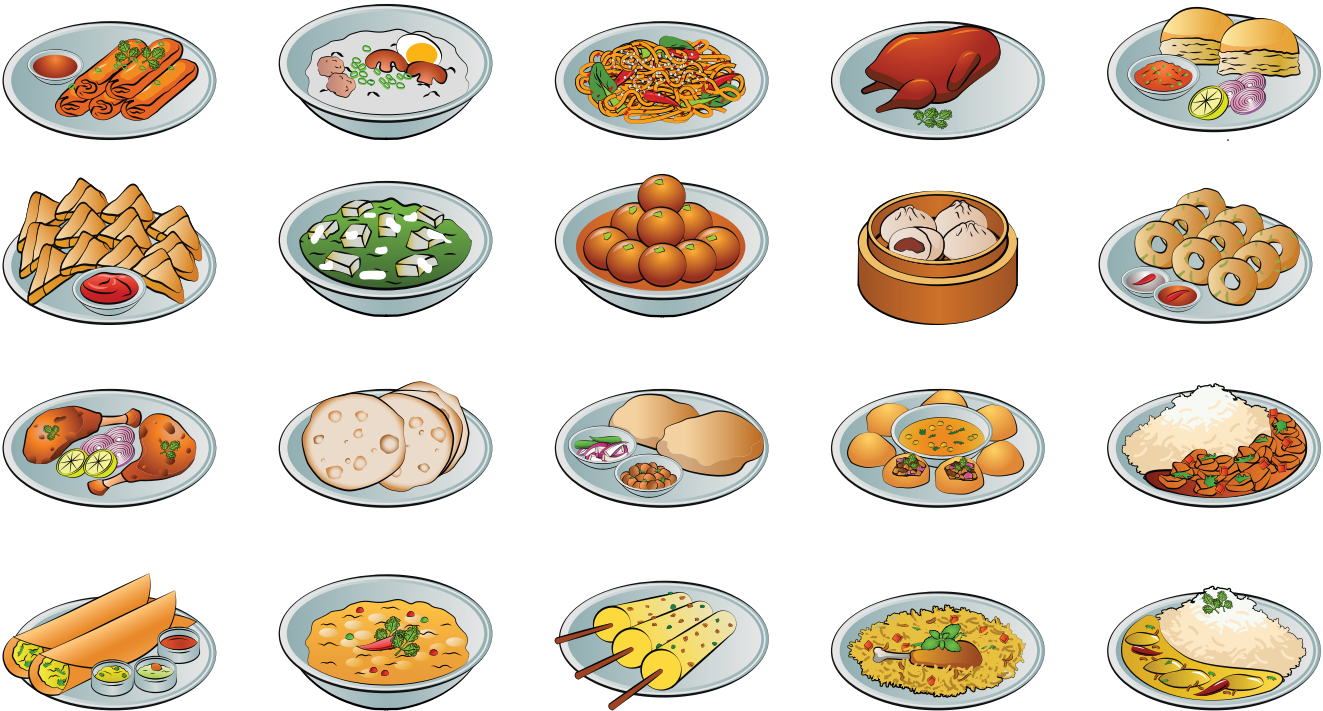

- Different Kinds of Food
- Water
- Meals in a day
- Good Eating Habits

We cannot live without food. We all need food to live and grow.

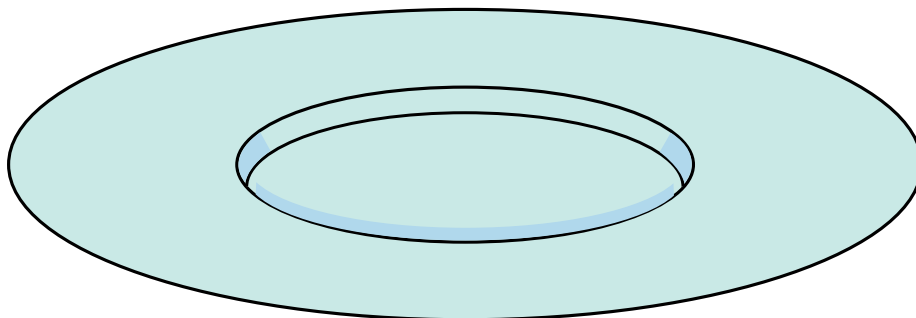

Circle the pictures of food you like.

Critical Thinking

Draw your favourite food items on this plate. Also colour them.

Art Integration

We eat food everyday. Food gives us energy to do all our activities like playing, studying, running, etc. It makes us healthy and strong.

DIFFERENT KINDS OF FOOD

We get food from both plants and animals. To grow strong and stay healthy, we need to eat a variety of foods.

Foods such as bread, rice, roti, sugar, potatoes, and butter give us energy to work and play.

Milk, eggs, fish, meat, and dal help in growth and development.

Fruits and vegetables keep us healthy and protect us from diseases.

Food that keep us healthy

Food that help us to grow

Food that give us energy

Factopedia

We should wash fruits and vegetables before eating them. This makes them free from germs.

We should eat all kinds of food in the right amount to stay healthy. Eating

too much can make us fat and eating too little can make us weak and thin.

WATER

Water is very important for us. It is important part of blood. It helps to throw out waste from the body. It is important to drink at least 8-10 glasses of water everyday.

MEALS IN A DAY

Meal is the food that we eat at a fixed time everyday.

We have three meals in a day.

We eat breakfast in the morning.

We eat lunch in the afternoon.

We eat dinner at night.

Meal : the food that we eat at a fixed time everyday

GOOD EATING HABITS

- * Wash your hands before and after eating food.
- * Never eat in a hurry. Chew your food properly.
- * Do not laugh or talk while eating.
- * Never skip meals.
- * Eat lots of fruits and vegetables.
- * Eat meals at the same time everyday.
- * Eat clean and healthy food.
- * Drink enough water.
- * Brush your teeth after meal.

Quick Recap

- * We eat different kinds of food to get energy.
- * Some foods like milk help us to grow.
- * Some foods like green leafy vegetables protect us from diseases.
- * We should wash fruits and vegetables well before eating them.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. We need to eat different kinds of food to grow:
a) Healthy ☐ b) Strong ☐ c) Both a) & b) ☐
2. _____ Keep us healthy.
a) Butter ☐ b) Fruits ☐ c) Both a) & b) ☐
3. We eat _____ at night.
a) Dinner ☐ b) Lunch ☐ c) Breakfast ☐
4. How many times do we eat food in a day?
a) One ☐ b) Two ☐ c) Three ☐

B. Write T for true and F for false statements.

1. We should eat lots of fruits and vegetables.
2. Food gives us energy for various activities.
3. We have two meals in a day.
4. We should drink enough water.

☐
☐
☐
☐

C. Fill in the blanks with suitable words given in the box.

Butter healthy morning skip rice eggs

1. Fruits and vegetables keep us_____.
2. _____ and _____ give us energy.
3. _____ help us to grow.
4. We eat breakfast in the_____.
5. We should never _____ meals.

D. Answer the following questions.

1. Why do we need food?

2. Which food products give us energy to work and play?

3. Why should we wash the fruits and vegetables properly before eating them?

CAPABILITY ANALYSIS

A. Given below are pictures of some food items. Circle the food items with **blue** crayon that you take for breakfast and circle the food items with **red** crayon that you take for dinner.

Multidisciplinary Learning

Curd

Pulao

Bread

Fish

Rice

Omelette

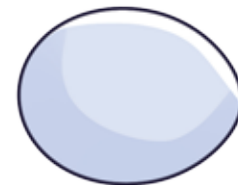

Jam

Vegetables

Milk

Egg

B. Rearrange the letters to get the names of some food we eat.

Critical Thinking

1. Geg _____
3. Dbrea _____
5. Cier _____

2. Lidi _____
4. Imlk _____
6. Team _____

HOTS

You did not eat breakfast yesterday and were feeling too weak to play at school. Why do you think you were feeling weak?

Scientific Temper

Housing and Clothing

Objectives

- Need for a house
- Need for Clothes

- Rooms in a House

Below are pictures of some smart AI-based gadgets and a list of rooms in a house. Match each gadget to the room where it would be most appropriately used

Critical Thinking

Smart TV

Smart Speaker

Smart Refrigerator

Bedroom

Bathroom

Drawing Room

Kitchen

Smart Bed

Smart Mirror

Smart Shower

We all need air, water, food, clothes and shelter to live. These are our basic needs.

NEED FOR A HOUSE

We all live in a house.

A house protects us from the heat of the sun, the cold, the wind and the rain.

It also keeps us safe from wild animals and thieves.

A good house has enough doors and window to allow fresh air and sunlight to enter.

We should keep our house neat and clean. We should make sure that the waste-bin is emptied every morning. We should keep our books, toys and other things in their proper place.

ROOMS IN A HOUSE

There are many **rooms** in a house. Each room has its own use.

Room : A place in the house meant for specific activity

We welcome our guests and look after them in the drawing room.

We cook food in the kitchen

We brush our teeth and take a bath in the bathroom.

We rest and sleep in the bedroom.

We eat our meals in the dining room.

We study in the study room.

The house in which we live with our family is our home. We must keep our home clean and tidy.

NEED FOR CLOTHES

We wear clothes to cover ourselves. They protect us from heat, cold, rain and wind.

We wear different clothes in different seasons of the year.

We wear clothes according to the fashion.

We wear woollen clothes in winter.

They keep us warm.

We get wool from sheep.

We wear cotton clothes in the summer. We get cotton from cotton plants. They absorb our sweat and keep our bodies cool.

Cotton : A type of material obtained from a plant and used to make clothes

In the rainy season, we wear a raincoat when it rains. It prevents us from getting wet. we also wear gumboots and use umbrellas.

Factopedia

We should wear clean and well-ironed clothes.

Quick Recap

- * Our house keeps us safe from bad weather, wild animals and thieves.
- * There are many rooms inside our house.
- * We need clothes to cover ourselves.
- * Clothes protect us from heat, cold, wind and rain.
- * We wear cotton clothes in the summer and woollen clothes in the winter.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. A house protects us from:

- a) Rain ☐ b) Cold ☐ c) Both a) & b) ☐

2. We rest and sleep in:

- a) Kitchen ☐ b) Bedroom ☐ c) Bathroom ☐

3. We wear t-shirt in:

- a) Summer ☐ b) Winter ☐ c) Rainy Season ☐

4. We wear gumboots in _____.

- a) Summer ☐ b) Winter ☐ c) Rainy Season ☐

B. Fill in the blanks with suitable words given in the box.

clean

umbrella

cotton

sheep

1. We should keep our house _____.
2. We wear _____ clothes in summer.
3. We get wool from _____.
4. We use a/an _____ when it rains.

C. Answer the following questions.

1. Why do we need a house?

2. Where do we get cotton from?

3. Why do we wear clothes?

CAPABILITY ANALYSIS

A. Circle two odd things in each set.

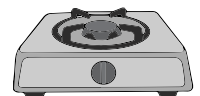

1. Bedroom

2. Bathroom

3. Kitchen

B. There are 12 windows and 6 doors in Neha's house. How many doors and windows are there in all?

Multidisciplinary Learning

C. Match the clothes with the season you wear them.

Experiential Learning

1.

HOTS

Why do we need so many rooms in our home?

Critical Thinking

Safety and First Aid

Objectives

- Safety Rules

- First Aid

We should never ignore traffic lights.

A. Read the poem about the traffic lights.

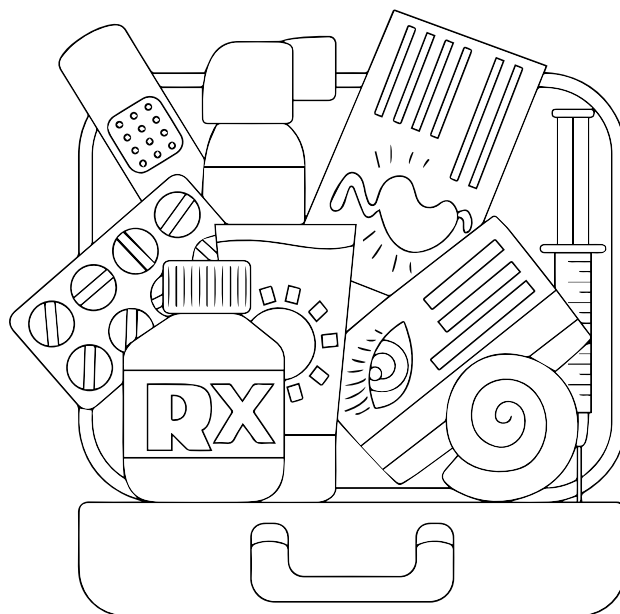

Twinkle, twinkle traffic light,
Round the corner shining bright.
Red means stop,
Green means go,
Yellow means very, very slow.
Twinkle, twinkle, traffic light.
Round the corner shining bright.

Communication Skills

B. Colour the first aid kit.

Art Integration

Sometimes we get hurt while running or playing. If you hurt, tell your teacher or parents. They will take you to a doctor if needed. The doctor will help you. To be safe, you must follow safety rules.

SAFETY RULES

We should be careful all the time. This will help us to stay safe. Following are some **safety** rules. Follow them and be safe.

While Walking

When you walk on the road, follow the safety rules:

- * Always walk on the footpath.
- * Always keep to your left while walking.
- * Do not run on the road.
- * Do not play on the road.

While Crossing the Road

While crossing the road, follow the safety rules:

- * Cross only when light is green for **pedestrians**.
- * Always cross the road at a **zebra crossing**.
- * Be careful on rainy days, as roads can be slippery.

Safety	: Staying away from harm
Pedestrian	: A person walking on the road
Zebra Crossing	: Broad white and black lines on the road

While Playing

While playing, follow the safety rules:

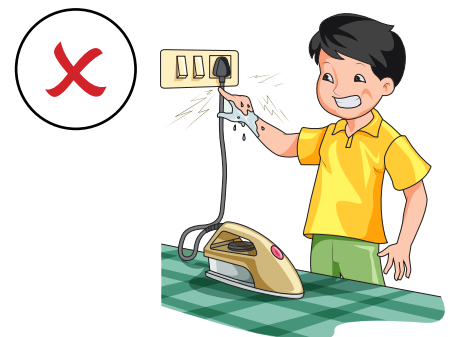

- * Do not push or pull each other while playing.
- * Do not play on or near a road.
- * Do not play near open drains or bushes.
- * Do not tease animals.

While at Home

An accident can happen at home also. To be safe at home, follow the safety rules:

- * Never play with fire, blades, knife, scissors or sharp objects.
- * Do not touch electric switches or gadgets with wet hands.
- * If you get hurt by chance, call your parents at once.

While Travelling

While travelling, follow the safety rules:

- * Do not run on the road.
- * Do not lean out of the window of a moving vehicle.
- * Do not jump off a moving bus. It can be dangerous.
- * Make a queue to get in the bus.
- * Do not push others.

While Swimming

While Swimming, follow the safety rules:

- * Use a rubber or Swimming tube while Swimming.
- * Always go for Swimming with an adult person.

FIRST AID

A treatment which is given before the arrival of a doctor is called **first aid**.

If any person gets hurt while doing his work, we should give him pre-treatment.

We should always have a first aid box at home and in our car.

Quick Recap

- * Always walk on the footpath.
- * Cross the road carefully at the zebra crossing.
- * Keep away from fire, sharp things and electricity.
- * A treatment which is given before the arrival of a doctor is called first aid.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. We should cross the road only when the traffic light is:

- a) red ☐ b) yellow ☐
c) green ☐

2. Where should we cross a road?

- a) Zebra crossing ☐ b) Camel crossing ☐
c) Horse crossing ☐

3. We should use a rubber tube while:

- a) playing ☐ b) swimming ☐
c) crossing a road ☐

B. Match the correct option.

Column A

1. Throw a used match stick in a
2. Wait for a bus to stop
3. Never go alone for
4. Always play in
5. While crossing the road, use

Column B

- a) zebra crossing.
- b) Swimming
- c) open and safe place
- d) dustbin
- e) before getting in or out

C. Circle the correct word.

1. Always walk on the **road/footpath**.
2. Cross the road at the zebra **crossing/turning**.
3. Make a **queue/circle** to get in the bus.
4. It is safe to play with **toys/fire**.

D. Answer the following questions.

1. Where should we walk on a road?

2. Should we play near the bushes?

3. Write any one safety rules we should follow while swimming?

4. Why should we have a first aid box at home?

CAPABILITY ANALYSIS

A. Learn the safety rules given in this lesson. Follow them. Draw one green star if the rules are being followed and one red star if the rules are not being followed.

Experiential Learning

Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7

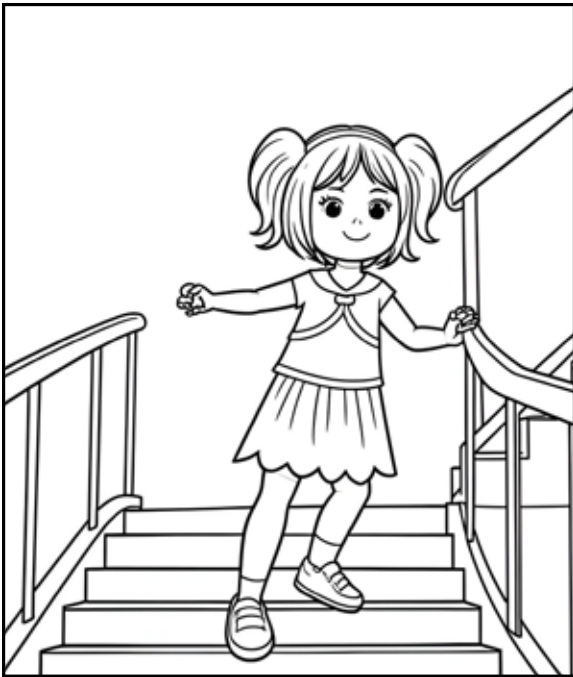

B. Collect pictures of any eight things that you find at home. Paste their pictures in your scrapbook. Now, make a table like the one given below. Write the names of the things in the correct columns.

Experiential Learning

Things that are safe

Things that are unsafe

C. Colour the picture in which safety rule is being followed.

HOTS

You are home alone and a stranger knocks on the door. What should you do?

Promotes thinking in unfamiliar situations

Air We Breathe

Objectives

- Air Occupies Space
- Air has Weight
- Air has Different Forms
- Uses of Air

Air is all around us. It is necessary for all living things. It helps us to breathe and remain alive.

Look at the pictures given below. What is being done in these activities?

Critical Thinking

Choose the things that have air in them.

Critical Thinking

We cannot see air but we can feel it when it moves. People, plants and animals cannot live without air.

You can feel air on a moving two-wheeler.

You can feel air on the window seat of a moving bus.

You can feel air in front of a moving fan

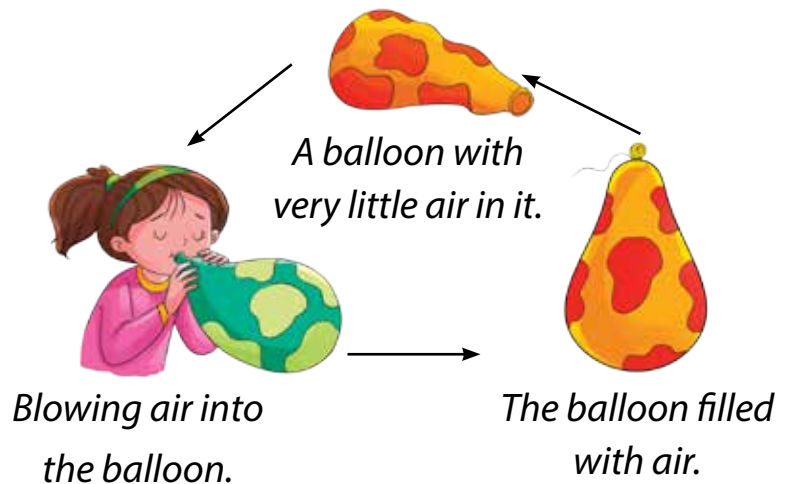

AIR OCCUPIES SPACE

What happens to a balloon when you blow air into it?

Air fills up the space inside the balloon and gives it shape.

It becomes bigger and bigger.

So, we can say that air takes up space.

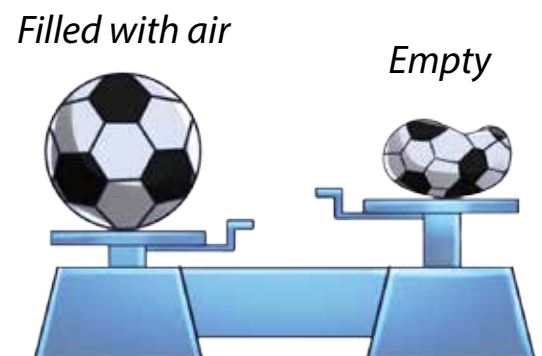

AIR HAS WEIGHT

Take two football of the same size. Fill one of them with air. Keep the other one empty.

Put both the ball on the pans of a balance. What do you see?

You will see that the ball filled with air goes downwards while the empty ball goes upwards.

This is because the ball filled with air has more weight than the empty ball. This proves air has weight.

AIR HAS DIFFERENT FORMS

We can feel air when it moves. Moving air is called **wind**. Wind has many names.

Slow and gentle moving air is called a **breeze**.

The breeze makes the weather pleasant.

Strong blowing winds are called **storms**.

Storms can damage our houses, lamp posts, crops and trees. They can also hurt human beings and animals.

Wind

Wind : moving air

breeze : when wind moves slowly

Storm : when wind blows very fast

USE OF AIR

Air has many uses.

- * Moving air can dry clothes.
- * Air is needed for a fire to burn because it contains oxygen.
- * Air is used to fill footballs, swimming tubes and vehicle tyres.
- * Human beings, animals and plants need air to breathe.
- * Fast-moving air can turn the blades of a windmill.

Fire

Dry Clothes

Football

Tyre Tube

Windmill

Quick Recap

- * We cannot see air but we can feel it when it moves.
- * Air has weight.
- * It occupies space.
- * Moving air is called wind.
- * Air has many uses.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. We can feel air in front of a moving _____
a) fan ☐ b) car ☐ c) bicycle ☐
2. Air fills up _____.
a) water ☐ b) space ☐ c) sand ☐
3. Which one causes damage?
a) Air ☐ b) Wind ☐ c) Storm ☐

B. Write T for true and F for false statements.

1. Air does not occupy space. ☐
2. Air has weight. ☐
3. We can feel air when it moves. ☐
4. Air is needed to burn things. ☐
5. Storms are always harmful. ☐

C. Answer the following questions.

1. Why do all living things need air?

2. What is moving air called?

3. How is a storm harmful to us?

CAPABILITY ANALYSIS

A. Put on your thinking cap and solve these riddles.

Critical Thinking

1. I use wind to fly in the sky.

I have a long tail and a very long string.

What am I?

K		T	
---	--	---	--

2. When I am switched on, I help to keep people cool in the room. What am I?

	A	
--	---	--

B. Tick (✓) the pictures in which air is used.

Critical Thinking

1.

☐

2.

☐

3.

☐

4.

☐

C. Stand in an open area. Take a little dry sand in your hand. Let the sand slowly fall from your hand. See which way the sand falls. This is the direction in which the wind is blowing.

Do this activity many times a day.

See whether the direction of the wind changes.

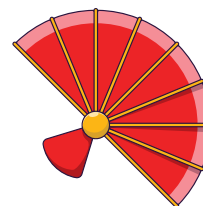

Multidisciplinary Learning

D. Make a paper fan.

Creativity

Get some colourful sheets. Your teacher will help you make a paper fan as shown alongside.

Water We Drink

Objectives

- Source of water
- Use of Water
- Drink Clean Water

All living things need water to live. People, animals and plants need water to stay alive.

Observe the picture carefully.

If you need one bucket of water to take a bath, how much water do you think a buffalo might need?

SOURCES OF WATER

Well

River

Pond

Lake

Sea

Rain

We get water from various sources such as wells, rivers, ponds, lakes, seas and oceans. We also get water from rain. Rainwater fills all the water bodies like sea, river, pond, etc.

Source : from which we get something

USES OF WATER

We use water for drinking.

We use water for washing.

We use water for bathing.

We use water for cooking.

We use water to put out a fire.

We use water for cleaning a paint brush.

DRINK CLEAN WATER

Drinking impure water can make us sick. If water is not pure, we must boil it. We can filter the water to make it pure.

Water Purifier

Quick Recap

- ✱ All living things need water to live.
- ✱ Rain is the main source of water.
- ✱ We can filter water to make it pure.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. Which one is a big water body?

- a) Lake ☐ b) Pond ☐ c) Sea ☐

2. The main source of water is _____.

- a) rain ☐ b) river ☐ c) lake ☐

3. We should drink _____ water.

- a) impure ☐ b) pure ☐ c) both a) & b) ☐

B. Identify and name the sources of water.

1. _____

2. _____

3. _____

C. Answer the following questions.

1. What are the various sources of water?

2. Why should we not drink impure water?

3. How can we make water pure?

CAPABILITY ANALYSIS

A. Collect and paste pictures of sources of water on chart paper.

Art Integration

B. List the activities in your daily life in which you use water.

Experiential Learning

C. Take a glass full of water. Add a spoonful of sugar to it. Stir the water. What happens to the sugar? Does it disappear? If yes, it means it gets dissolved in water. Repeat the experiment with sand and salt. Write down your findings.

Experiential Learning

D. Read and follow the tips to save water.

Life Skills

- * Turn off the tap tightly after use.
- * Use bucket instead of shower to bathe.
- * Empty your water bottles to water plants.

E. Read and follow the tips to save water. Also colour the slogan.

Art Integration

*USE LESS,
SAVE MORE,
KEEP WATER PURE.*

HOTS

Why should we not drink water directly from rivers and lakes?

Environment and Health

Weather Today

Objectives

- Sunny Days
- Rainy Days

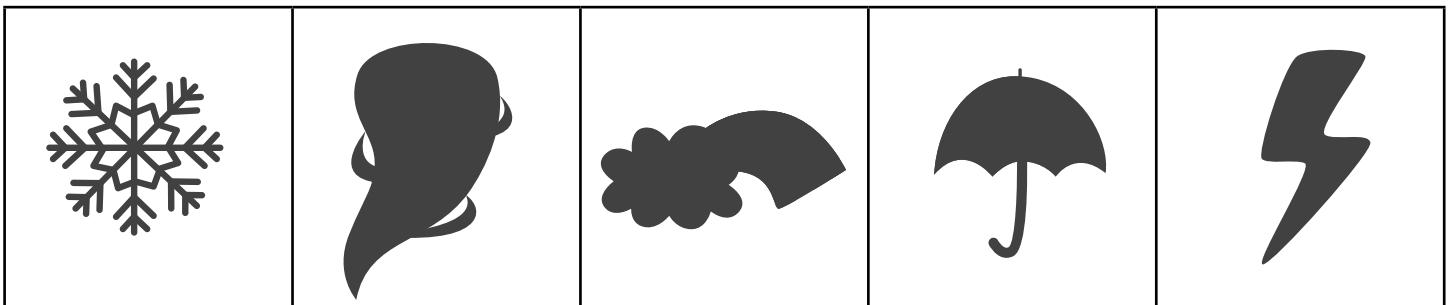

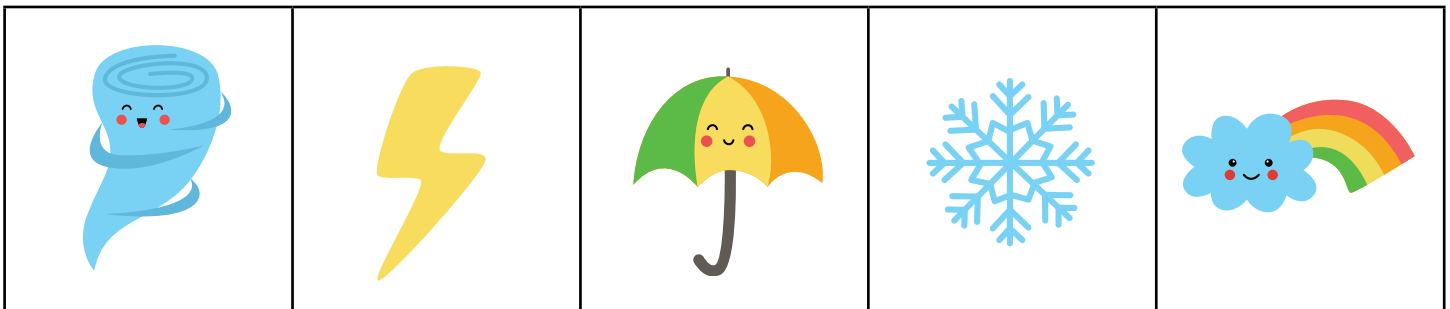

- Cold Days
- Windy Days

Some days are hot. Some days are cool. Some days are cool and windy. On some days, it rains. Weather is the condition of the air at a particular time or place. It changes from day to day.

So, the weather does not remain the same.

Match the weather symbols to their correct shadow.

Critical Thinking

SUNNY DAYS

Some days of the year are very hot. On these days, the sun shines brightly. We wear cotton clothes to stay cool.

COLD DAYS

The weather is cool on a cold day. We like to stay indoors.

We wear woollen clothes. **Woollen** clothes keep our bodies **warm**.

Children make snowman and play with snow.

Cold Day

woollen : made up of wool

warm : hot

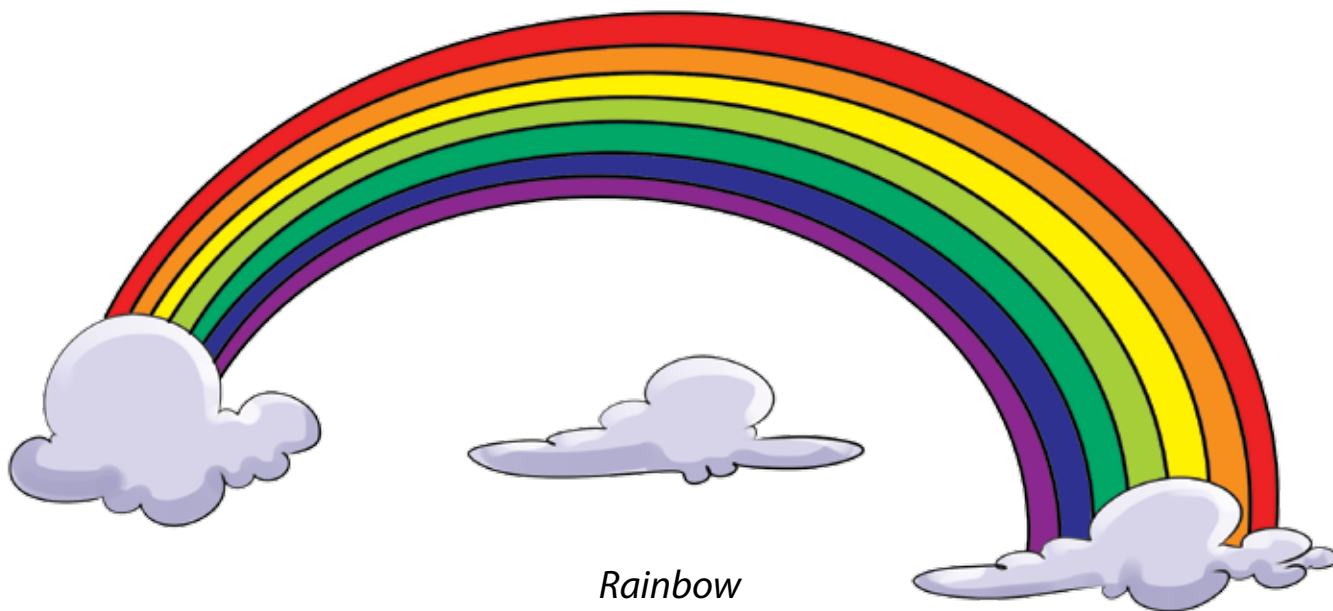

RAINY DAYS

It rains a lot during the rainy season. Rain is good for us. Plants and animals need rain too. Rainwater fills up rivers, ponds, lakes and oceans.

Sometimes we see a rainbow after rain. A rainbow has seven colours. They are - violet, indigo, blue, green, yellow, orange and red.

Remember the first letters of these colours - **VIBGYOR**

WINDY DAYS

On some days, the wind blows very strongly. A strong wind can blow things away.

Quick Recap

- ✧ Weather is the condition of the air at a particular time or place.
- ✧ The weather is hot on sunny days.
- ✧ The weather is cool on cold days.
- ✧ The weather is wet on rainy days.
- ✧ We see a rainbow after rain.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. The weather is cool on a _____ day.
a) cold ☐ b) hot ☐ c) rainy ☐
2. We see this in the sky after it rains..
a) Clouds ☐ b) Rainbow ☐ c) White sky ☐
3. We wear cotton clothes in:
a) rainy season ☐ b) winter ☐ c) summer ☐

B. Write T for true and F for false statements.

1. The weather changes from day to day. ☐
2. Cotton clothes keep us warm. ☐
3. The sun shines brightly on a cold day. ☐
4. We see a rainbow after rain. ☐
5. Strong winds blow on windy days. ☐

C. Write the seven colours of a rainbow.

- | | |
|----------|----------|
| 1. _____ | 2. _____ |
| 3. _____ | 4. _____ |
| 5. _____ | 6. _____ |
| 7. _____ | |

D. Answer the following questions.

1. What do you mean by weather?

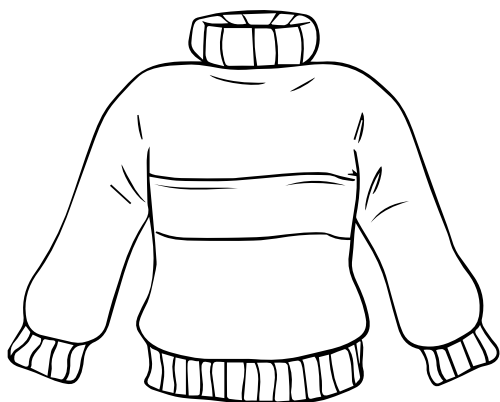

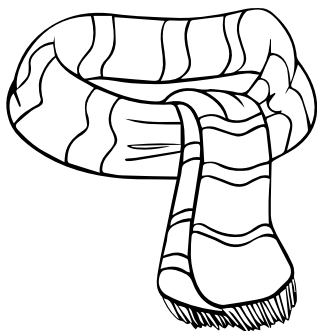

2. What kind of clothes do you wear in winter?

3. What do we sometimes see in the sky after it rains?

CAPABILITY ANALYSIS

A. Colour these clothes and tick(✓) the one which we do not use in winter.

Art Integration

☐☐☐☐

B. List the activities that you like to do in the various seasons.

Experiential Learning

Sunny days

Cold days

Rainy days

C. Read the sentences and decide if they are true or false.

Multidisciplinary Learning

1. **Monday** was sunny.

True

☐

False

☐

2. **Tuesday** was windy.

True

☐

False

☐

3. **Wednesday** was rainy.

True

☐

False

☐

4. **Thursday** was cloudy.

True

☐

False

☐

5. **Friday** was stormy.

True

False

☐

The Sun, Moon and Stars

Objectives

- The Sun

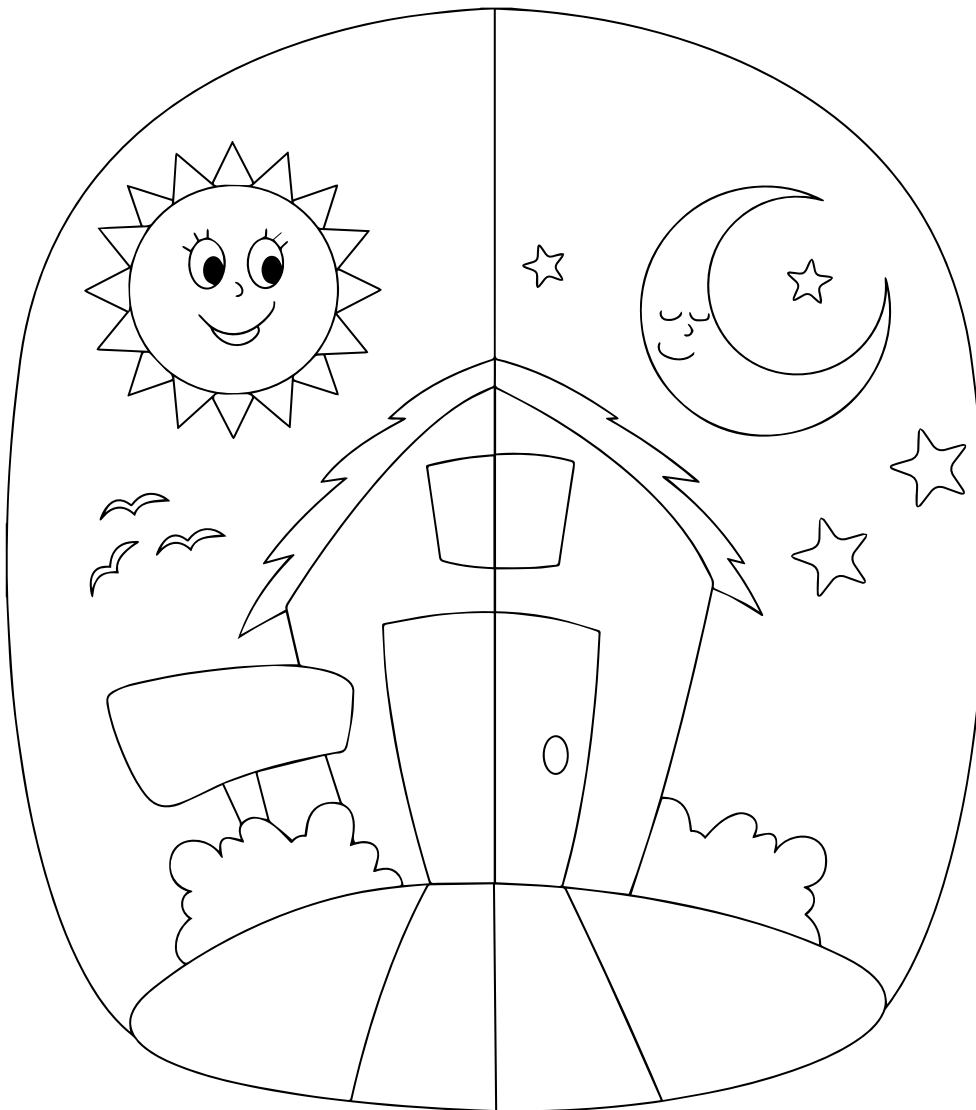

- The Stars

- The Moon

We live on the Earth. We see different things in the sky at different times of the day and night.

Colour the picture and name the things that you see during the day and at night.

Art Integration

THE SUN

The sun rises in the east in the morning. A new day begins with the rising of the sun. Every evening, the sun sets in the west.

The sun shines to give us light and heat. The Sun is a round ball of hot gases. The sun makes the days warm and bright. The sun helps plants grow.

THE MOON

The moon shines in the night sky. It does not have its own light. It takes the light from the sun. The shape of the moon is round. But its shape changes everyday. The moon is much smaller than the sun.

THE STARS

We also see many stars at night. They shine brightly in the sky. Stars are big, bright and hot like the sun. They have their own light. They are very far away from us. So, they appear very small to us and their heat does not reach us.

Factopedia

Some stars have special patterns. These are called constellations.

Quick Recap

- ✱ The sun rises in the east and sets in the west.
- ✱ The moon comes out at night.
- ✱ The moon changes its shape everyday.
- ✱ The stars are like sun but they are very away from us.

ABSTRACT ANALYSIS

A. Tick (✓) the correct option.

1. The sun rises in the:
a) east ☐ b) west ☐ c) south ☐
2. The sun sets in the:
a) east ☐ b) west ☐ c) south ☐
3. The moon gets light:
a) from the sun ☐ b) from itself ☐ c) from the sky ☐
4. The stars shine at:
a) morning ☐ b) afternoon ☐ c) night ☐

B. Fill in the blanks with suitable words given in the box.

shape Moon Plants and animals constellation gases

1. The Sun is a round ball of hot _____.
2. _____ comes out at night and changes its shape everyday.
3. The moon changes its _____ everyday.
4. Special patterns made by stars are called _____.
5. The sun helps _____ to grow.

C. Write Yes or No.

1. Is the sun round like a ball?
2. Does the moon have different shapes on different nights?
3. Does the moon appear bigger than the stars?
4. Can you see the moon and the stars during the day?

☐
☐
☐
☐

D. Write the seven colours of a rainbow.

1. When do you see the sun?

2. What is the shape of a full moon?

3. When can we see the stars in the sky?

CAPABILITY ANALYSIS

A. Here is a list of words. Write them in the proper columns.

Critical Thinking

school dinner sleep play stars sunlight dark
lunch dream breakfast owl

When sun is in the sky

When moon is in the sky

B. Help the astronaut through the space maze to find its spaceship in the starry galaxy.

Problem Solving

C. Look at the 3D model of the moon. Follow the link

Digital Resources

<https://solarsystem.nasa.gov/resources/2366/earths-moon-3d-model/> to improve your experience. Put on your 3d glasses to see the moon up-close in glorious depth.

D. Make your own Moon Diary. Draw different shapes of the moon that you see every night.

Creativity

HOTS

On cloudy nights, why can't we see the moon?

Critical Thinking

Test Paper 1

(Based on Chapter 1-6)

A. Tick (✓) the correct option.

1. Which one of these is a non-living thing?
a) Cat ☐ b) Book ☐ c) Parrot ☐
2. Which of the following is not a creeper?
a) Pumpkin ☐ b) Watermelon ☐ c) Spinach ☐
3. Which one of the following is an insect?
a) Sparrow ☐ b) Parrot ☐ c) Spider ☐
4. Animals who live in our home with us are called?
a) Water animals ☐ b) Pet animals ☐ c) Insects ☐
5. Different animals eat _____ kind of food?
a) Different ☐ b) Same ☐ c) Both a) & b) ☐
6. Our whole body is covered with:
a) Tongue ☐ b) Nose ☐ c) Skin ☐

B. Match the correct option.

Column A

1. Hibiscus
2. Money plant
3. Pumpkin
4. Mint

Column B

- a) Creeper
- b) Herb
- c) Shrub
- d) Climber

Fill in the blanks with suitable words given in the box.

trunk insect vegetables growing trees fruits Rabbits

1. We should keep our surroundings green by_____.
2. The stem of a tree is called _____.

3. Plants give us _____ and _____.
4. The mosquito is a/an _____.
5. _____ makes burrow to live.

**D. Some animals went looking for food and forgot the way to their home
Can you match the animals with the places where they live?**

1.

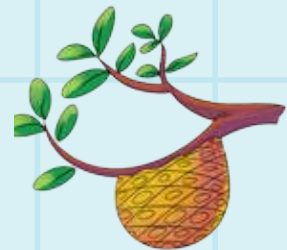

a)

2.

b)

3.

c)

4.

d)

E. Answer the following questions.

1. Give two examples of living things.
2. What are trees? Give one example.
3. Give two examples of vegetables.
4. How many legs do the insects have?
5. What are the five sense organs?

Test Paper 2

(Based on Chapter 1-6)

A. Tick (✓) the correct option.

1. We eat _____ at night.

- a) dinner ☐ b) lunch ☐ c) breakfast ☐

2. We wear gumboots in _____.

- a) summer ☐ b) winter ☐ c) rainy season ☐

3. Which one causes damage?

- a) Air ☐ b) Wind ☐ c) Storm ☐

4. What is the main source of water?

- a) River ☐ b) Rain ☐ c) Lake ☐

5. We see this in the sky after it rains.

- a) Clouds ☐ b) Rainbow ☐ c) White sky ☐

6. The sun sets in the:

- a) east ☐ b) west ☐ c) south ☐

B. Match the following.

Column A

1. Throw a used match stick in a
2. Wait for a bus to stop
3. Never go alone for
4. Always play in
5. While crossing the road, use

Column B

- a) zebra crossing.
- b) Swimming
- c) open and safe place
- d) dustbin
- e) before getting in or out

C. Write T for true and F for false statements.

1. Fruits keep us healthy. ☐
2. We get wool from sheep. ☐
3. Air does not occupy space. ☐
4. We should drink pure water. ☐
5. The sun shines on a cold day. ☐
6. The moon has different shapes on different nights. ☐

B. Tick (✓) the pictures in which air is used.

1.

☐

2.

☐

3.

☐

4.

☐

E. Answer the following questions.

1. Why do animals need food?
2. Where do we get cotton from?
3. What is moving air called?
4. What kind of cloth do you wear in winter?
5. When can we see the stars in the sky?
